PRIYANSHU GUPTA

Full Stack Software Engineer

+91 93241 48255 · priyanshugupta007007@gmail.com · github.com/PryCoder · linkedin.com/in/priyanshu-gupta-664b30321 · Ulhasnagar, MH

PROFESSIONAL SUMMARY

Innovative Full Stack Software Engineer with 1+ year of hands-on experience architecting, developing, and deploying scalable, high-performance, real-time web applications. Highly proficient in React.js, Next.js, Node.js, and TypeScript with deep expertise in system design, cloud-native technologies (Docker, Kubernetes), and enterprise-grade security (JWT, RBAC, OAuth 2.0). Passionate about harnessing cutting-edge AI technologies — OpenAI GPT-4, LangChain, and RAG pipelines — to solve complex real-world problems. Recognized as a proactive communicator, dependable team player, and meticulous engineer who takes full ownership from B2B requirement gathering through production deployment, system monitoring, and continuous improvement.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, SQL
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend	Node.js, Express.js, FastAPI, RESTful APIs, WebSockets, Microservices
Databases	PostgreSQL, MongoDB, MySQL, Firebase Firestore, Redis, Supabase
Auth & Security	JWT, OAuth 2.0, Firebase Auth, RBAC, HTTPS/TLS, System Security
AI / ML	LangChain, RAG Pipelines, LLM Agentic Workflows, Vector DBs
DevOps & Ops	Docker, Kubernetes, Git, GitHub, System Monitoring, Incident Management, CI/CD, Agile/Scrum

WORK EXPERIENCE

Web Developer Intern — Websites.co.in — Remote *May 2025 - June 2025*

- Spearheaded the end-to-end design, development, and launch of a fully responsive, production-ready React.js + Firebase website for MicMac Environmental NGO — achieving a 35% improvement in page load speed through strategic code splitting, lazy loading, and CDN-optimized asset delivery, while exercising complete ownership across all project phases.
- Forged strong B2B client relationships by proactively gathering NGO stakeholder requirements and translating them into robust, scalable technical solutions — engineered high-converting donation pipelines and dynamic campaign modules that drove a 20% uplift in donor conversion and led a targeted on-page SEO overhaul (structured data, Core Web Vitals) that elevated organic traffic by 15%.

PROJECTS

EpicShot — Full-Stack Social Media Platform | *React.js · Node.js · Express.js · MongoDB · Firebase · WebSockets*

- Architected and shipped a resilient, production-grade social media platform featuring posts, real-time push notifications, and live feeds via WebSockets — sustaining 100+ concurrent users at sub-100ms latency with proactive system monitoring and incident management protocols maintaining 99.9% uptime.
- Fortified application security with hardened JWT + RBAC authentication, CSRF protection, and granular API authorization scoping; engineered optimized MongoDB aggregation pipelines and compound indexes that slashed query latency by 40% — shared detailed written performance reports across the engineering team to drive alignment.

FlowDesk — LLM-Powered Agentic Productivity Assistant | *React.js · Node.js · OpenAI GPT-4 · LangChain · Supabase*

- Conceived, designed, and delivered an enterprise-grade AI productivity assistant powered by LangChain tool-calling agents and OpenAI GPT-4 — autonomously handling task delegation, intelligent scheduling, and document summarization; coordinated cross-functional rollout that reduced manual employee overhead by 30%.
- Engineered a sophisticated Retrieval-Augmented Generation (RAG) pipeline backed by Supabase vector embeddings, achieving 85%+ contextual answer relevance on live organizational knowledge bases; produced comprehensive technical documentation enabling seamless system maintenance and accelerated team onboarding.

Resto AI — Intelligent Restaurant Management System | *React.js · Node.js · MongoDB · Firebase · OpenAI API · WebSockets*

- Designed and delivered a feature-rich, multi-role B2B restaurant operations platform (Admin, Kitchen, Waiter) with live WebSocket order tracking, AI-driven sales forecasting via OpenAI API, and intelligent predictive inventory alerts — reducing food waste by 25% and equipping restaurant owners with real-time, data-backed revenue dashboards for confident decision-making.

EDUCATION

B.E. in Computer Engineering — Lokmanya Tilak College of Engineering, Navi Mumbai *CGPA: 7.96/10 | May 2026*

Coursework: Data Structures & Algorithms, System Design, Web Development, Machine Learning, Blockchain & Cryptocurrency, Distributed Systems

CERTIFICATIONS

- Principles of Generative AI — Infosys Springboard (2024)
- React.js Development — Infosys Springboard (2024)
